At first glance it would appear that Daniel Gould could be the organ grinder in the photograph. However, Mr. O'Hearn does not think that Mr. Gould was organ grinding at the time of the photograph and therefore it must be two separate persons.

**THE AUBURN BULLETIN,  
MONDAY, JANUARY 10, 1898.**

**DEATH OF D. A. GOULD.**

The familiar face of Daniel Arnold Gould, who for several years has furnished the street corners with music from a small hand organ, will be seen no more, for after an illness of two weeks he died yesterday at noon. He was a soldier in the war, enlisting in Co. C., 111th N. Y. Volunteers, under Captain L. W. Husk, in August, 1862, and served as brigade blacksmith until June, 1865, and was then discharged with the regiment. He was an expert horse shuer and worked at his business after the war until he met with an affliction which resulted in the entire loss of sight, some 27 years ago. He bore up bravely under his misfortune and did what he could to make his way in the world. He is survived by one daughter, who resides in Michigan, and a son whose whereabouts are at present unknown.

I think it is surprising that a small town like Auburn, NY, would actually have two organ grinders within a short period of time but the analysis suggests that this could be the case.

Bob Conant is a retired gavaman and organ grinder living in Bradenton, FL, with his wife, Cherri.
